

# Case Study

## Brownfield Rehabilitation

The operator of this network failed leaving the OC with major problems. Bills were unpaid at the gate and poor network construction was not recovering gas and hot water.

Develop a solution that righted the network, institute proper billing and credit management, help to address outstanding bills and begin to deliver a surplus

Work with the Manager to rectify the network and negotiate with the utility providers. Update customer details and institute regular billing and credit management.

This network is now operating efficiently, customers are billed regularly and debt is well managed. Gate meter costs are met and the network is delivering a surplus.

Currently generating a 4 figure surplus pa.
